Department of Computing & Information System

Report

Course Code : CIS 216L
Course Name : Object Oriented Programming Lab
Topic Name : Practice problem

Daffodil Submitted To: University

Name : MD. NASIMUL KADER
Designation : Assistant Professor

Submitted By:

Name : Atif Anwar
ID : 253-16-035
Section : 23-A
Semester : Fall 2026

Submission Date: 30/09/26

Lab Report Code (Java Basic)

1. DataType.java

```
package Report_1;

public class DataType {
    public static void main(String[] args) {
        byte b=100;
        short s=1000;
        int i=200;
        long l=1000000;
        float f=1.23f;
        double d=1.27645645;

        char ch='A';
        String str="I am Rashed";

        boolean bo=true;

        int[] arr={2,3,4,5,6,7};

        Integer wrapperClass=Integer.valueOf(50);
        StringBuilder obj=new StringBuilder("Rashed");

        System.out.println("byte: " + b);
        System.out.println("short: " + s);
        System.out.println("int: " + i);
        System.out.println("long: " + l);
        System.out.println("float: " + f);
        System.out.println("double: " + d);
        System.out.println("char: " + ch);
        System.out.println("boolean: " + bo);

        System.out.println("String: " + str);
    }
}
```

```

        System.out.print("Array: ");
        for (int num : arr) {
            System.out.print(num + " "); // sudhu print. 'ln'->
\n moto kaj kore
        }

        System.out.println();

        System.out.println("Wrapper Integer: " + wrapperClass);
        System.out.println("StringBuilder: " + obj);
    }
}

```

Output

```

4. Condition.java

```
package Report_1;  
  
public class Condition {  
    public static void main(String[] args) {  
        int number = 50;  
        if (number > 0) {  
            System.out.println("The number is positive.");  
        }  
        if (number%2 == 0) {  
            System.out.println("The number is even.");  
        } else {  
            System.out.println("The number is odd.");  
        }  
  
        if (number < 0) {  
            System.out.println("The number is negative.");  
        } else if (number == 0) {  
            System.out.println("The number is zero.");  
        } else {  
            System.out.println("The number is positive.");  
        }  
  
        int day = 2;  
        switch (day) {  
            case 1:  
                System.out.println("Monday");  
                break;  
            case 2:  
                System.out.println("Tuesday");  
                break;  
            case 3:  
                System.out.println("Wednesday");  
                break;  
            default:
```

```

        System.out.println("Other day");
    }
}

```

Output

```

'--enable-preview' '-XX:+ShowCodeDetailsInExceptionMessages' '-
rt\Report-01\bin' 'Report_1.Condition'
The number is positive.
The number is even.
The number is positive.
Tuesday
